Thanks for the clarification. I believe it would be about 24-0007 mostly, I'm responding to the letter sent out on June 18 by Opalco.

Hi Kevin,

It still appears you are referring the annual docket requests. OPALCO has two active docket requests (24-0007 and 24-0008). Please review them here: [Annual Docket | San Juan County, WA \(sanjuancountywa.gov\)](#) Comments on specific docket requests received before noon today will be forwarded to the commission prior to the public hearing tomorrow.

Thanks,

Brooke K. Sullivan, PhD | *Environmental Planner IV*

No this is about Opalco trying to change the Agricultural and forestry to include Agri- solar generation farms, I'm against seeing solar farms throughout our farm lands. I don't believe the two will work together. I have not seen a

proposed cost of these solar farms and with Opalco raising our rates 6% every year for the next 4 years plus this year who bears the cost and the maintenance cost, to my knowledge solar panels will need to be replaced to age or damage. I believe even if they put the panels up so animals can go under them not much will grow under the panels other than weeds, this cuts down on the haying and feed for animals. I guess this my opinion, so I'm against that, thanks, have a good day

Hi Kevin,

Is this in relation to the annual docket? If so, can you let me know what number(s) you would like this comment applied to?

Thanks,
